Tovertafel

Discover the care innovation for adults with
learning disabilities

tover.care/ie

“

“The projections, the sounds and music: we see clients who you wouldn’t expect suddenly put out their arms and react. Days are more beautiful when you have seen the clients enjoying themselves”

Lotte,
Activity Counselor, Day Activity Center ASVZ,
The Netherlands

Purposeful play: the power of play

The Tovertafel is the number one care innovation for learning disability care. Our distinctive technology helps caregivers improve the quality of life of their **adult clients with learning disabilities**. Worldwide, the Tovertafel has been **installed in more than 6,000** institutions and has become part of **daily activities**.

The Tovertafel offers the **best hardware and software** for your clients and care workers. Our interactive, projected games have been developed in **intensive cooperation with the target group** and are based on **scientific research**. Because our serious games are specifically developed for adults

with learning disabilities, they perfectly match their needs and capabilities. Thanks to the **layered game design**, each player can play at their own level.

Our ingenious game design ensures **special contact moments** every day. Moments that connect, break down barriers and trigger reactions that care workers have never seen before. All with the Tovertafel. Are you playing?

Advantages of the Tovertafel:

- Suitable for people with profound and multiple learning disabilities to moderate learning disabilities
- Excellent for both 1-on-1 contact and in groups
- Extremely simple installation
- Easy to use and get started at the press of a button
- Appropriate for the daily programme
- Movable between different suspension points

How the Tovertafel amazes

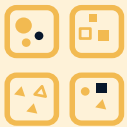

Thanks to the handy click-and-go system, the Tovertafel is quick and easy to install. From wheelchair tray to floor, the games can be used on **any flat surface**. The games consist of **interactive light projections**

in which smart technology detects even the smallest movements. This makes the playing experience distinctive, intuitive and enchanting. Every single time.

How does it work?

1. Switch on with a simple press of a button

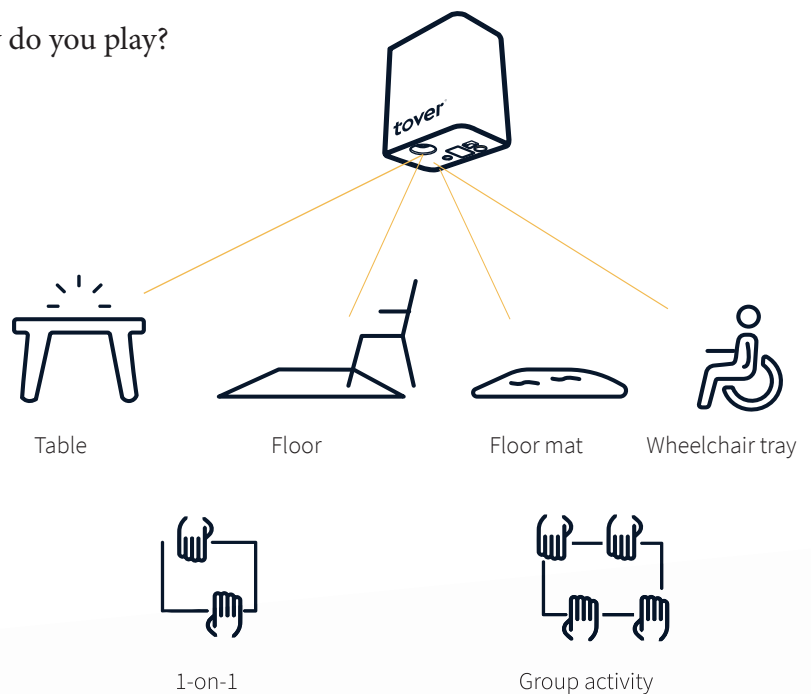

2. Choose from a variety of games

3. Switch between the games using the remote control

How do you play?

What do you achieve?

Relaxation

Stimulation

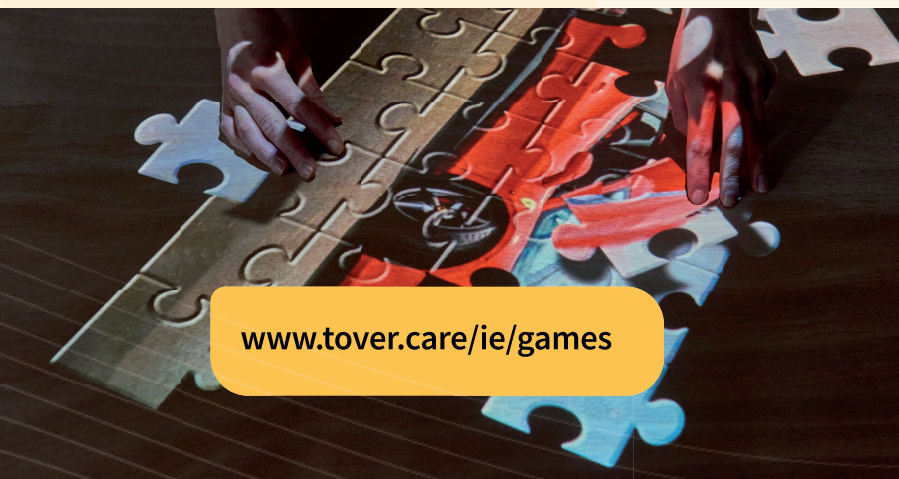

Development

What you really want to know:

- Stimulates **social interaction** and **physical activity**
- Increases **alertness**, **focus** and **self-confidence**
- Facilitates **contact** between caregiver and client
- Creates **shared moments of happiness** for people of different levels
- Offers a rich selection of games that is regularly expanded

Co-design

Cooperation with the target group and research play an important role in the development of our products. And we do not take this lightly. During this process, we involve **the best international experts and stakeholders** in the field. We call this co-design.

Research and quality

In addition, we **continuously research** new developments that contribute to the quality of life of the target group. The result? Groundbreaking games that **perfectly match** the needs of the players and their care workers. This is how we ensure that quality **always** comes first at Tover.

The effects* of playing with the Tovertafel, backed by research

We are continuously doing research to improve the quality of life of adults with learning disabilities.

Effects on players

- Increases happiness and fun
- Stimulates social activity and interaction
- Stimulates movement
- Increases alertness and focus

Effects on healthcare workers

- Improves the relationship between healthcare workers and clients
- Promotes interaction and helps connect
- Increases job satisfaction
